

A Year of Growth and Milestones

The Learning & Development team hit major milestones in 2025, driving training excellence and supporting the growth of the organization's brands. This year included successful rollouts for key client launches in tech, finance, and retail, ensuring field readiness from day one.

L&D expanded specialized programs with CTPAT compliance training and a new Customer Service Training section in our LMS featuring over two dozen modules for leaders and officers focused on professionalism, service, and client engagement. Our Illinois licensing course was also revised for stronger visibility, boosting compliance and onboarding outcomes.

We also led safety initiatives including client Fire Life Safety Training and the launch of a National Training Center supporting CPR, licensing, and other essentials. Across the country, over 300 students were certified in CPR through the combined efforts of 17 certified instructors and 3 instructor trainers.

These achievements reflect L&D's commitment to developing a stronger, safer, and more skilled workforce.

The Learning & Development Team

Resources

2025 By the Numbers

We are establishing best practices to ensure the most up-to-date, user-friendly, and high-quality content is provided for all associates across the organization's brands. This includes updating legacy content and working with account leadership to engineer job- and client-specific curricula that place us as a leader in officer training and advocacy.

- LMS Courses Created: 178
- LMS Courses Updated: 313
- New Managers Trained: 233
- Over 4000 New Hires Onboarded
- More than 38,000 Training Courses Completed

LOOKING AHEAD:

Expanded Leadership Training

We're taking leadership development to the next level with the launch of our Management Development Program (MDP). Building on the foundation of our recent leadership training efforts, the MDP is designed to help current and emerging leaders grow with purpose. The MDP consists of a series of engaging courses, each with accompanying book selections, mentor engagement sessions, and practical applications. Participants will further strengthen their communication, adaptability, and emotional intelligence. The program reinforces our people-first culture, empowering leaders to navigate change, build strong relationships, and create lasting impact. We're excited to continue investing in our future leaders and shaping the next chapter of leadership across the organization.

LMS Updates

- The LMS landing page has been replaced with the Learner Dashboard, so training assignments now appear right away.
- The new "Reset Password" feature allows users to reset their LMS passwords directly from the login page. A tutorial course is assigned to all users, providing guidance on this and other features. Site management will continue supporting officers as needed. Talent Acquisition specialists are encouraged to share login credentials directly with new users for smooth onboarding.
